SURFACE AND COATINGS TECHNOLOGY VOLUME 59, NUMBERS 1–3, OCTOBER 1, 1993

Contents

Preface v

FUNDAMENTALS

Comparison of microwave and r.f. plasmas: fundamentals and applications 1
M. Moisan and M. R. Wertheimer (Montreal, Qué., Canada)

Process and advantage of multicomponent and multilayer PVD coatings 14
O. Knotek, F. Löffler and G. Krämer (Aachen, Germany)

Deposition of graded alloy nitride films by closed field unbalanced magnetron sputtering 21
D. P. Monaghan (Salford, UK), D. G. Teer, K. C. Laing (Kidderminster, UK), I. Efeoglu and R. D. Arnell (Salford, UK)

Laser induced plasma: a source of control of the properties of thin films 26
E. W. Kreutz, A. Voss, M. Alunovic, J. Funken and H. Sung (Aachen, Germany)

MODELLING

Modelling of discharges and non-thermal plasmas — applications to plasma processing 32
J. P. Boeuf, L. C. Pitchford, A. Fiala and Ph. Belenguer (Toulouse, France)

Attempted modelling of thickness and chemical heterogeneity in coatings prepared by d.c. reactive magnetron sputtering 41
A. Billard and C. Frantz (Nancy, France)

A practical model to enable the prediction of coating thickness variations across a flat surface 48
A. S. James, P. A. Robinson and A. Matthews (Hull, UK)

Experimental and theoretical study of the electrical properties of a triode reactor 54
R. J. Seeböck, W. E. Köhler, M. Römheld (Erlangen, Germany) and U. Zellhuber (Tübingen, Germany)

Modelling of a microwave postdischarge nitriding reactor 59
H. Malvos (Nancy, France), A. Ricard (Orsay, France), J. Szekely (Cambridge, MA, USA), H. Michel, M. Gantois and D. Ablitzer (Nancy, France)

PLASMA DIAGNOSTICS

Spectroscopy of flowing discharges and post-discharges in reactive gases 67
A. Ricard (Orsay, France)

In-situ monitoring of electron cyclotron resonance plasma chemical vapour deposition of hydrogenated silicon nitride films 77
M. Boumerzoug, R. V. Kruzelecky, P. Mascher and D. A. Thompson (Hamilton, Ont., Canada)

Diagnostics of a d.c. pulsed-plasma-assisted nitriding process 82
R. Hugon, G. Henrion and M. Fabry (Vandoeuvre, France)

Calculation of ion energy distributions in low frequency r.f. glow discharges 86
A. S. James and A. Matthews (Hull, UK)

Characterization of a TiN deposition process based on structural studies, plasma diagnostics and mathematical modelling 91
T. Czerwiec (Nancy, France), M. Remy (Vandoeuvre lès Nancy) and H. Michel (Nancy, France)

Determination of mass and energy distribution of ions in glow discharges 97
S. Peter, R. Pintaske, G. Hecht and F. Richter (Chemnitz, Germany)

Control of reactive d.c. magnetron sputtering of SnO_2 by means of optical emission 101
V. Kirchhoff and U. Heisig (Dresden, Germany)

PROCESS CONTROL

Control of mechanical and structural properties of coatings deposited using unbalanced magnetrons 105
R. D. Arnell (Salford, UK)

PC system for improving the control of reactive gas dosage in sputtering processes for film deposition 110
G. N. Pedersen, H. Jensen and G. Sørensen (Aarhus, Denmark)

Coating thickness fall-off with source to substrate distance in PVD processes 113
K. S. Fancey and A. Matthews (Hull, UK)

The influence of additive rare earths on ion carburization 117
G. Li and H. Jin (Dalian, People's Republic of China)

Influence of plasma treatment conditions on growth and electrical properties of oxides on InP 121
A. Bouziane, M. Remy, Z. Ouennoughi, C. Simon (Vandoeuvre lès Nancy, France) and M. Alnot (Villers lès Nancy, France)

Behaviour of a steered cathodic arc as a function of steering magnetic field 126
P. J. Walke, R. New and C. M. Care (Sheffield, UK)

Process control of plasma nitriding and plasma nitrocarburizing in industry 129
W. Rembges and W. Oppel (Leverkusen, Germany)

Influence of the reactive gas flow on chromium nitride sputtering 135
H. Jensen, U. M. Jensen, G. N. Pederson and G. Sørensen (Aarhus, Denmark)

PLASMA BASED DEPOSITION TECHNIQUES

Sputter coating on high speed steel tube using a hybrid plasma produced by coaxial ECR and magnetron discharges ... 140
H. Fujiyama, H. Kawasaki, T. Fujiyama and S. Takagi (Nagasaki, Japan)

Pulsed barrier discharges for thin film production at atmospheric pressure 144
U. Reitz, J. G. H. Salge and R. Schwarz (Braunschweig, Germany)

New flexible reactor design for R&D PECVD deposition systems 148
R. Arendt, M. Kaiser, B. Bontschew and H.-J. Frenck (Munich, Germany)

Arc-enhanced glow discharge in vacuum arc machines 152
J. Vetter, W. Burgmer and A. J. Perry (Bergisch Gladbach, Germany)

RFe_2 (R = rare earth) thin film formation by an ion beam sputtering system with a plasma filament type ion source 156
Y. Matsumura, T. Noguchi, T. Kurino, H. Kaneko, H. H. Uchida and H. Uchida (Kanagawa, Japan)

Preparation and performance of (Cr,Ti)N coatings deposited by a combined hollow cathode and cathodic arc technique 160
G. Ebersbach, D. Fabian (Chemnitz, Germany), W. Wuttke, (Zwickau, Germany) and H. A. Jehn (Schwäbisch Gmünd, Germany)

REACTIVE DEPOSITION PROCESSES

Reactive magnetron sputtering of zirconium carbide films using Ar–CH_4 gas mixtures 166
J. Brückner (Chemnitz, Germany) and T. Mäntylä (Tampere, Finland)

High rate deposition of alumina films by reactive gas flow sputtering 171
T. Jung and A. Westphal (Hamburg, Germany)

Aspects and results of long-term stable deposition of Al_2O_3 with high rate pulsed reactive magnetron sputtering 177
P. Frach, U. Heisig, Chr. Gottfried and H. Walde (Dresden, Germany)

R.f. magnetron sputter deposition of Cr_2O_3 layers on ceramic Al_2O_3 substrates 183
U. Rothhaar and H. Oechsner (Kaiserslautern, Germany)

Deposition and characterization of non-conducting silicon nitride, aluminum nitride and titanium–aluminum nitride thin films 187
I. J. R. Baumvol, F. C. Stedile, W. H. Schreiner (Porto Alegre, Brazil), F. L. Freire, Jr. (Rio de Janeiro, Brazil) and A. Schröer (Heidelberg, Germany)

MOCVD

Remote plasma-enhanced chemical vapour deposition with metal organic source gases: principles and applications 193
W. Kulisch (Kassel, Germany)

Synthesis of thin coatings by plasma-assisted chemical vapour deposition using metallo-organic compounds as precursors 202
K.-T. Rie, J. Wöhle and A. Gebauer (Braunschweig, Germany)

Plasma-assisted deposition of hard material layers from organometallic precursors 207
Ch. Täschner, K. Bartsch and A. Leonhardt (Dresden, Germany)

Thin copper films deposited by low temperature plasma-enhanced metal organic chemical vapour deposition using copper-acetylacetonate 212
A. Hamerich (Hannover, Germany), L. Lottermoser and J. Müller (Hamburg, Germany)

The formation of Ti(OCN) layers produced from metal–organic compounds using plasma-assisted chemical vapour deposition 217
T. Wierzchoń, J. R. Sobiecki and D. Krupa (Warsaw, Poland)

ION AND PLASMA BEAM TECHNIQUES

Modification of near-surface regions in Si by low energy particles 221
H. A. Klose, P. Thiele and S. Zinnow (Berlin, Germany)

Some technical aspects of ion implantation as an industrial process for surface modification of metal 226
F.-J. Körber (Hanau, Germany)

Direct plasma beam deposition of TiN_x layers with an r.f. plasma beam source 234
F. R. Weber and H. Oechsner (Kaiserslautern, Germany)

A plasma-based technique for controlled low energy ion bombardment of dielectric surfaces 239
D. Martin and H. Oechsner (Kaiserslautern, Germany)

Oxidation resistance of PVD Cr, Cr–N and Cr–N–O hard coatings 244
B. Navinšek and P. Panjan (Ljubljana, Slovenia)

Modification of the mechanical surface properties and tribochemistry of structural ceramics by ion beam techniques 249
W. Fischer, H. Wituschek, G. K. Wolf (Heidelberg, Germany), H. Ferber, R. Heinze (Stuttgart, Germany) and M. Woydt (Berlin, Germany)

Ion-assisted modification of the condensation of thermal carbon atoms 255
J. Ullmann (Chemnitz, Germany), H. Martin and G. K. Wolf (Heidelberg, Germany)

PLASMA PULSE TREATMENT

Microstructure, corrosion and tribological behaviour of plasma immersion ion-implanted austenitic stainless steel 261
M. Samandi, B. A. Shedden, D. I. Smith (Wollongong, N.S.W., Australia), G. A. Collins, R. Hutchings and J. Tendys (Menai, N.S.W., Australia)

Plasma immersion ion implantation — the role of diffusion 267
G. A. Collins, R. Hutchings and J. Tendys (Menai, N.S.W., Australia)

Superimposed pulse bias voltage used in arc and sputter technology 274
W. Olbrich and G. Kampschulte (Stuttgart, Germany)

Synthesis of Al_2O_3 condensates from impulse plasma 281
K. Zdunek (Warsaw, Poland)

Layers of high speed steel with microstructures characteristic of heat-treated materials 287
A. Michalski and A. Olszyna (Warsaw, Poland)

PLASMA–SURFACE INTERACTION

Plasma treatment for cleaning of metal parts 290
J. Fessmann (Esslingen, Germany) and H. Grünwald (Filderstadt, Germany)

Surface etching of three-dimensional carbon-fibre-reinforced plastics in a dual-frequency mode plasma (40 kHz and 2.45 GHz) 297
M. Meyer, A. Mittasch, G. Staudigl and R. Suchentrunk (Munich, Germany)

Influence of plasma surface treatment on the adhesion of thin films on metal 301
W. Petasch, K. Baumgärtner, E. Räuchle and M. Walker (Stuttgart, Germany)

Plasma-enhanced chemical vapour deposition of thin insulator films and reactor cleaning 306
M. Vogt, E. Kändler, S. Martin and K. Drescher (Dresden, Germany)

Investigations concerning the role of hydrogen in the deposition of diamond films 310
P. Joeris, C. Benndorf and R. Kröger (Hamburg, Germany)

Topological effects regarding trench structures covered with LPCVD and PECVD thin films 316
J. Schlote, S. Hinrich, B. Kuck and K.-W. Schröder (Frankfurt, Germany)

Ion nitriding of Armco iron in various glow discharge regions 321
J. Michalski (Warsaw, Poland)

Adhesion of metal coatings on ceramics deposited by different techniques 325
S. Schmidbauer, J. Hahn, F. Richter (Chemnitz, Germany), B. Rother and H. Jehn (Schwäbisch Gmünd, Germany)

A microstructural and morphological study of diamond crystals and films elaborated by microwave plasma assisted chemical vapour deposition 330
S. Barrat, H. Michel and E. Bauer-Grosse (Nancy, France)

PLASMA POLYMERIZATION

Broad range variation in surface tension by plasma-polymerized coatings on polymethyl methacrylate 338
W. Michaeli, K. Telgenbüscher, J. Striffler, J. Leiber and M. Stollenwerk (Aachen, Germany)

Plasma polymerization of silicon organic membranes for gas separation 342
J. Weichart and J. Müller (Hamburg, Germany)

Deposition of Me–C:H coatings from metal organic precursors using a plasma-activated r.f. process 345
C. Benndorf, J. T. Harnack and U. Fell (Hamburg, Germany)

Surface modification of polypropylene in oxygen and nitrogen plasmas 350
K. Harth and H. Hibst (Ludwigshafen, Germany)

Factors influencing the hydrophobic recovery of oxygen-plasma-treated polyethylene 356
J. Behnisch, A. Holländer and H. Zimmermann (Teltow-Seehof, Germany)

Thin conductive coatings formed by plasma polymerization of 2-iodothiophene 359
A. Kruse, A. Baalmann, W. Budden, V. Schlett (Bremen, Germany) and M. Hennecke (Berlin, Germany)

Optical properties of plasma polymer films 365
H.-U. Poll, J. Meichsner, M. Arzt, M. Friedrich, R. Rochotzki and E. Kreyßig (Chemnitz, Germany)

Improvement in polymer adhesivity by low and normal pressure plasma surface modification 371
J. F. Friedrich (Berlin, Germany), P. Rohrer, W. Saur (Freienbach, Germany), Th. Gross, A. Lippitz and W. Unger (Berlin, Germany)

The indexes for these Proceedings appear in Volume 60.
